

Physics 275 Syllabus – Fall 2011

Professor George Goldenbaum

What the course is about:

Physics 275 is the second course in the introductory lab course sequence Physics 174-275-276. The course is intended mainly for physics students, but other science and engineering students who have a desire for a more rigorous introduction to experimental science can also enroll. Experiments are mainly chosen in the general area of mechanics. A major component of the course is to understand the theory and applications of error analysis at an introductory level. The lab meets for four hours each week in Room 3203 of the Physics Building.

Web Site: To get the latest information on Physics 275, check the web site at:

<http://www.physics.umd.edu/courses/Phys275/index.html>

or on Blackboard at <https://elms.umd.edu/>.

* **Prerequisites:** The prerequisites for the course are Physics 174 and Physics 171 (or 161).

***Meeting CORE requirements:** Please note that you must be simultaneously enrolled in Physics 272 in order to receive credit for a CORE physical sciences laboratory course.

Lab sections: There are four lab sections:

Lab section	Day	Time	Instructor	TA
0101	Monday	1-4:50 PM	Goldenbaum	M. Schauber
0301	Tuesday	2-5:50 PM	Goldenbaum	M. Schauber
0201	Wednesday	2-5:50 PM	Goldenbaum	S. Cowan
0401	Thursday	2-5:50 PM	Goldenbaum	S. Cowan

Instructors:

Prof. George Goldenbaum, ggoldenb33@verizon.net

Office: Physics 0106, phone: 301-467-8391

* **Office Hours:** You may stop by my office at any time. If you can't find me, please make an appointment by phone or e-mail.

Teaching Assistants: (TBD)

* Arriving late to class:

Classes at Maryland begin right on the hour. It is important that you arrive on time so that you can get instructions for the lab and have time to finish. If you arrive more than 10 minutes late, you may not be allowed into the lab and will have to make it up during another section.

*** Making Up Missed Labs:**

You should make every effort not to miss your regularly scheduled lab. If you miss your regular lab section, you should make that lab up by contacting the Professor (ggoldenb33@verizon.net) and arranging to go to another section that week.

*** Texts**

- “A Practical Guide to Data Analysis for Physical Science Students” by Lyons
- “Physics 275 Lab Manual” – Latest edition

*** Grading:**

- 50% Spreadsheet Lab Report & Homework
- 25% Exam 1
- 25% Exam 2

***Homework** is assigned at the end of each Lab. You will turn your homework and any revisions to your lab by uploading your modified Excel spreadsheet file to Blackboard. You can turn in your report and homework anytime during the week, but by no later than the first Sunday after the lab. Corrected homework should be available the following week. **No credit will be given for late homework unless you are seriously ill and provide a written note from your physician.**

*** General Comments on the Lab report and Homework:**

Finishing all the lab reports and homework sets is very important. If you can't completely finish a lab and homework set, it is still important to turn in what you do have. When you are working on your report or homework, feel free to discuss among yourselves to try to figure out what is going on. By all means get together in small groups and discuss. However, do not use these discussions as an excuse to copy someone else's report or homework solution, or let someone else copy yours. That is cheating, and is strictly forbidden. It is also very self-defeating since the other part of your grade will come from tests. The right way to proceed is to first work through the report and problems by yourself and arrive at a definite answer. With this preparation, you can then discuss intelligently with your colleagues and see if you have missed something essential. Of course, you can always ask the instructor or TA.

*** In case of University closing:** If the University is closed during a scheduled lab, class will be cancelled, and we will most likely reschedule the lab either for the following week or later in the semester. Closing is announced over local radio and TV as well as on the University's homepage. We will send an email concerning makeup dates when the University is closed.

Important Dates (preliminary)

<u>Week of</u>	<u>Experiment</u>
Sep 12	Experiment 1 Review + Experiment 2 - Dice
Sep 19	Experiment 3 – Radioactive <i>Decay</i>
Sept 26	Experiment 4 - <i>Position, Velocity and Acceleration</i>
Oct 3	Experiment 5 - <i>Free fall of a mass</i>
Oct 10	Makeup
Oct 17	Experiment 6 -- <i>Review</i>
Oct 24	First Practical Exam
Oct 31	Experiment 7- <i>Standing Waves</i>
Nov 7	Experiment 8 - <i>Mass and Spring Oscillator</i>
Nov 14	Experiment 10 - <i>Measuring g with a pendulum</i>
Nov 21	Thanksgiving
Nov 28	Experiment 11 - Review
Dec 5	Second Practical Exam
Dec 12 Monday only	Makeup
