

Polarization

$$\vec{k} \parallel \hat{z}$$

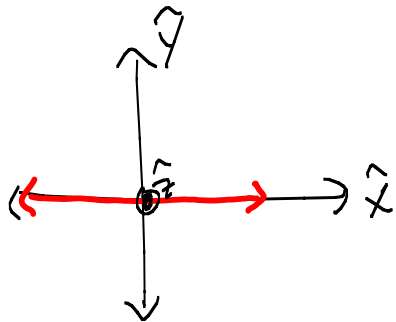

View along $-\vec{k}$

$$\vec{E} = \text{Re} \left\{ E_{0y} \hat{y} e^{-i\omega t} \right\}$$

$$\vec{E} = \text{Re} \left\{ E_{0x} \hat{x} e^{-i\omega t} \right\}$$

$$\vec{E} = \text{Re} \left\{ (E_{0x} \hat{x} + E_{0y} \hat{y}) e^{-i\omega t} \right\}$$

Superposition w/ Complex Coefs.

$$E_{0x} = A \quad E_{0y} = B e^{i\Delta\phi}$$

$\Delta\phi$: phase difference between E_{0x} and E_{0y}

Example: $E_{0x} = E_0 \quad E_{0y} = E_0 e^{i\Delta\phi}, \quad \Delta\phi = \frac{\pi}{2}$

LCP

$$\vec{E} = \text{Re} \left\{ \left(E_0 \hat{x} + E_0 e^{i\frac{\pi}{2}} \hat{y} \right) e^{-i\omega t} \right\}$$

$$= \text{Re} \left\{ E_0 (\hat{x} + i\hat{y}) e^{-i\omega t} \right\}$$

$$x: \text{Re} \left\{ E_0 e^{-i\omega t} \right\} = E_0 \frac{e^{i\omega t} + e^{-i\omega t}}{2} = E_0 \cos \omega t$$

$$y: \text{Re} \left\{ E_0 i e^{-i\omega t} \right\} = E_0 \frac{i e^{-i\omega t} - i e^{i\omega t}}{2}$$

$$= E_0 \frac{e^{i\omega t} - e^{-i\omega t}}{2i} = E_0 \sin \omega t$$

(RCP by $\Delta\phi = -\frac{\pi}{2}$)

$$|\vec{E}| = \sqrt{E_0^2 \cos^2 \omega t + E_0^2 \sin^2 \omega t} = E_0$$

General case:

$$|E_{0x}| \neq |E_{0y}| \quad \Delta\phi \text{ arbitrary}$$

$$|\Delta\phi| \neq \frac{\pi}{2}$$

→

α : angle of inclination

χ : ellipticity

$\chi = 0$ linear

$\chi = \frac{\pi}{4}$ circular

Nomenclature: Jones vectors

$$\vec{E} = \text{Re} \{ E_x \hat{x} + E_y \hat{y} \} \longrightarrow \begin{bmatrix} E_x \\ E_y \end{bmatrix}$$

eg. $E_{ox} = |E_x|$, $E_{oy} = |E_y| \rightarrow$ find α, χ

Basis: \hat{x}, \hat{y} basis $\begin{bmatrix} A \\ B \end{bmatrix}$

Rotation matrix $\begin{bmatrix} \cos \theta & \sin \theta \\ -\sin \theta & \cos \theta \end{bmatrix}$

Example: use $+45^\circ, -45^\circ$

$$\frac{1}{\sqrt{2}} \begin{bmatrix} 1 & 1 \\ -1 & 1 \end{bmatrix} \begin{bmatrix} 0 \\ 1 \end{bmatrix} \stackrel{\text{vertical linearly pol.}}{=} \begin{bmatrix} 1 \\ 1 \end{bmatrix}$$

$$\frac{1}{\sqrt{2}} \begin{bmatrix} 1 & 1 \\ -1 & 1 \end{bmatrix} \begin{bmatrix} 1 \\ 0 \end{bmatrix} = \begin{bmatrix} 1 \\ -1 \end{bmatrix}$$

Polarization Elements (polarizers, etc)

Matrices!

$$\begin{bmatrix} A \\ B \end{bmatrix} \xrightarrow[\text{TA} \parallel \hat{y}]{\text{polarizer}} \begin{bmatrix} 0 \\ B \end{bmatrix}$$

$$\begin{bmatrix} A \\ B \end{bmatrix} \xrightarrow[\text{TA} \parallel \hat{x}]{\text{polarizer}} \begin{bmatrix} A \\ 0 \end{bmatrix}$$

$$\begin{bmatrix} 0 & 0 \\ 0 & 1 \end{bmatrix} \begin{bmatrix} A \\ B \end{bmatrix} = \begin{bmatrix} 0 \\ B \end{bmatrix}$$

$$\begin{bmatrix} 1 & 0 \\ 0 & 0 \end{bmatrix} \begin{bmatrix} A \\ B \end{bmatrix} = \begin{bmatrix} A \\ 0 \end{bmatrix}$$

Polarizer w/TA at θ from vertical:

$$\begin{bmatrix} \cos\theta & \sin\theta \\ -\sin\theta & \cos\theta \end{bmatrix} \begin{bmatrix} 0 & 0 \\ 0 & 1 \end{bmatrix} = \begin{bmatrix} \cos\theta & -\sin\theta \\ \sin\theta & \cos\theta \end{bmatrix}$$
$$= \begin{bmatrix} \sin^2\theta & \sin\theta\cos\theta \\ \sin\theta\cos\theta & \cos^2\theta \end{bmatrix}$$

Phase Retarder

Birefringence: n is polarization-dependent

$$\begin{bmatrix} 1 & 0 \\ 0 & e^{i\Delta\phi} \end{bmatrix} \begin{bmatrix} A \\ B \end{bmatrix} = \begin{bmatrix} A \\ Be^{i\Delta\phi} \end{bmatrix}$$

Examples:

$\Delta\phi = \frac{\pi}{2}$ ("QWP") initial polarization linear @ 45°

$$\begin{bmatrix} 1 & 0 \\ 0 & e^{i\frac{\pi}{2}} \end{bmatrix} \begin{bmatrix} 1 \\ 1 \end{bmatrix} = \begin{bmatrix} 1 \\ i \end{bmatrix} \rightarrow \text{circular polarization}$$

$\Delta\phi = \pi$ ("HWP")

$$\begin{bmatrix} 1 & 0 \\ 0 & e^{i\pi} \end{bmatrix} \begin{bmatrix} 1 \\ 1 \end{bmatrix} = \begin{bmatrix} 1 \\ -1 \end{bmatrix} \rightarrow \text{linearly polarized} \\ \text{@ } -45^\circ$$

Alternative nomenclature: Stokes parameters

$$S_0 = I$$

$$S_1 = I_p \cos 2\alpha \cos 2\chi = E_x^2 - E_y^2$$

$$S_2 = I_p \sin 2\alpha \cos 2\chi = E_{45}^2 - E_{-45}^2$$

$$S_3 = I_p \sin 2\chi = E_{LCP}^2 - E_{RCP}^2$$

experimentally
measurable

QWP : rotation along polar direction (χ)

HWP : rotations along azimuthal direction (α)
