MEMORANDUM

TO: CNAM graduate students and faculty

FROM: M. S. Fuhrer

SUBJECT: CNAM Seminar Course – Phys 838C

DATE: December 21, 2009

Attached is the spring 2010 schedule for the CNAM seminar course, Phys 838C.

All graduate students who are research assistants in the CNAM are requested to register for this course for 2 credits every semester until you graduate. Register Now! If registering for this course causes you to register for more than 10 credits per semester or causes other problems, please see me. Grading is based on your individual presentation, your attendance, your participation in discussion, and your speaker evaluations.

You should prepare your talk as if it were an interview seminar to an audience knowledgeable in condensed matter/materials physics, but not expert in your particular research area. Your presentation should be about 30 minutes long and include 10-15 minutes of background material that can be understood by everyone in the audience. Another 15 minutes (beyond the 30) are reserved for questions/discussion.

All students and faculty should attend this seminar in order to keep informed of the breadth of research in condensed matter/materials physics at the University of Maryland. Any requested changes in this schedule must be approved by me first and arranged at least 2 weeks in advance.
