Incoming survey for Phys601 (Fall 2016) by Dr. Agashe

1. Name: ________________________________________________________________________________

2. List courses (at advanced undergraduate or graduate level) in Classical Mechanics that you took, giving the textbooks used; the year, semester and the name of the school (and course number and instructor if taken at UMD)
   ______________________________________
   ______________________________________
   ______________________________________
   ______________________________________

3. What textbooks in classical mechanics (at advanced undergraduate or graduate-level) do you currently have (including any you bought for Phys601)?
   ______________________________________
   ______________________________________
   ______________________________________
   ______________________________________

4. When do you plan to take the qualifying exam here (or indicate if you have passed it already)? You can put “Not sure” (if that is the case)!
   _______________________________________________________________________________________

5. List any topics (beyond the standard ones of Langragian and Hamiltonian approaches, including their applications) that you are specifically interested in studying in Phys601 (for example, chaos or classical field theory).
   ______________________________________
   ______________________________________
   ______________________________________
   ______________________________________

6. Any other comments, suggestions (for example, on textbook)?
   ______________________________________
