

Exam III: GRADING ERROR CORRECTION

In Physics 117 Fall 2005 Exam III Problem #14 was poorly posed, in that two answers were correct, (B) and (E), but only (E) was graded as correct. The students listed below chose the second correct answer (B), and two points have been added to their raw scores in our record.

As a result, the Class Average for Exam III increase by 0.8 to 63.6, and the Standard Deviation increased by 0.1 to ± 14.7 .

All students' renormalized grades are changed slightly by this correction. The corrected Raw scores, and the re-calculated Normalized scores for Exam III will be posted soon on WebCT, and a new Score Distribution graph will be posted on our 117 course website. JJG 12/08/05
