The diagram depicts two pucks on a frictionless table. Puck II is four times as massive as puck I. Starting from rest, the pucks are pushed across the table by two equal forces.

Which puck will have the greater momentum upon reaching the finish line?

- A. Puck I
- B. Puck II
- C. Both will have the same.
- D. There is not enough information to decide.

The diagram depicts two pucks on a frictionless table. Puck II is four times as massive as puck I. Starting from rest, the pucks are pushed across the table by two equal forces.

Which puck reach the finish line first?

- A. Puck I
- B. Puck II
- C. Both will have the same.
- D. There is not enough information to decide.

Physics 131

The diagram depicts two pucks on a frictionless table. Puck II is four times as massive as puck I. Starting from rest, the pucks are pushed across the table by two equal forces.

Which puck will have the greater KE upon reaching the finish line?

- A. Puck I
- B. Puck II
- C. Both will have the same.
- D. There is not enough information to decide.

The diagram depicts two pucks on a frictionless table. Puck II is four times as massive as puck I. Starting from rest, the pucks are pushed across the table by two equal forces. Which graph might show the **speed** of the two pucks.

A young child wants to select one of the (frictionless) playground slides illustrated below to give her the greatest possible speed when she reaches the bottom of the slide. Which should she choose?
