# Physics 171 Introductory Physics: Mechanics and Relativity Spring 2010 — Professor Abazajian

Updated January 26, 2010

**Course topics:** Kinematics, Newton's laws, energy and work, special relativity, rotational kinematics, angular momentum, gravity, fluids, and gases. This course is designed for physics majors and those desiring a rigorous preparation in the physical sciences. Knowledge of basic calculus will be assumed.

**Prerequisites:** Math 140 (Calculus I) and a high school physics class, or permission of the department.

**Lectures:** Mondays, Tuesdays, Thursdays, and Fridays from 10:00–10:50. Mondays and Fridays are in room 1201 of the Physics Building, and Tuesdays and Thursdays are in room 0127 of the Chemistry building. See the Course Schedule for the planned topic(s) for each lecture. The schedule may shift around by a day or so if some topics take more or less time than expected.

**Required textbook:** "Physics for Scientists and Engineers" by Tipler and Mosca, sixth edition, volume 1, published by W. H. Freeman and Company as an E-Book, available online at <a href="http://ebooks.bfwpub.com/physse6e.php">http://ebooks.bfwpub.com/physse6e.php</a> for \$25 and a printed version (optional) for an extra \$25. With the E-Book, you should subscribe to the annotation set numbered 17428252. You do not need to bring the book to class. Most lectures are associated with 1-4 sections from the book as indicated on the Course Schedule, and *you should read those prior to the lecture*.

Homework will be assigned about once per week and must be turned in at the beginning of class on the specified date (or earlier). Don't wait until the last day to get started! Please do all of the homework and turn it in on time, unless you have a valid excuse (i.e. illness, a religious observance, or some other compelling reason). If you do not have a valid excuse, you can still turn in the homework up to 24 hours late for half credit; after that, no credit will be given. As an exception to the 24-hour cutoff, if the homework was due on a Friday, then it will be accepted in class on the following Monday for half credit. (Homework due on Tuesday will be accepted late only up to Wednesday morning, not Thursday.)

If you are unable to finish the complete homework assignment on time, then you may turn in a partial set of answers on time for full credit, and then turn in the remaining answers late for half credit. However, this practice is discouraged since it complicates the grading and bookkeeping. If you must turn in additional answers late, please write "Additional answers – turned in late" at the top of your page to help us keep things straight.

**Exams:** There will be three **exams** during the semester plus a final exam. The exams will be given in class, on paper, and will be closed-book. Any needed physical constants or data will be provided. You will need a calculator with standard trigonometry functions, etc. Exams must be taken on the scheduled days unless you have a valid excuse. If you know in advance that you will have to miss an exam, please inform me as soon as possible.

**Up-to-date course information and your scores on assignments** will be available on the ELMS (Blackboard) system. If you go to <a href="http://elms.umd.edu">http://elms.umd.edu</a> and log in with your username (which is your campus "Directory ID") and password, you should see the course listed in the "My Courses" panel.

## Course grade:

4001	
40%	Homework
4070	HOHIEWORK

12% Each exam during the semester

24% Final exam

#### How to do well in this course:

Do your readings *before* the lecture on the material. Come to the lectures. Do all the homework. Ask for help (your professor, TA, or a classmate) whenever there is something you don't understand. *Utilize office hours!* The professor and TA are here to help with the material, not make it harder. Review your notes and past homework assignments before each exam.

#### **Contact Information:**

Prof. Kevork Abazajian, 4101 Physics Building, 301-405-6009, <a href="mailto:kev@umd.edu">kev@umd.edu</a>
Usual office hours: Mondays 4:00-5:00pm and Fridays 4:00-5:00pm in room 4101
TA/Grader: TBA

\*\*\* NOTE: Office hours are subject to change - watch for announcements

If you are unable to come during regular office hours, please contact us by email or phone to ask a question and/or arrange a time to meet.

#### **Honor Code:**

The University of Maryland, College Park has a nationally recognized Code of Academic Integrity, administered by the Student Honor Council. This Code sets standards for academic integrity at Maryland for all undergraduate and graduate students. As a student you are responsible for upholding these standards for this course. It is very important for you to be aware of the consequences of cheating, fabrication, facilitation, and plagiarism. For more information on the Code of Academic Integrity or the Student Honor Council, please visit http://www.studenthonorcouncil.umd.edu/whatis.html .

#### Students with disabilities:

Accommodations will be provided to enable students with disabilities to participate fully in the course. Please discuss any needs with your instructor at the beginning of the semester so that appropriate arrangements can be made.

## Weather and emergency closures:

If the University is closed due to weather or some emergency situation on a day when homework is due, then that homework must be turned in at the beginning of the next class when the University is open. If the University is closed on the scheduled date of an exam, then the exam will be given during the next class period when the University is open. If the University is closed on any non-exam day, including a review session (the class immediately before an exam), then the exam will still be given according to the original schedule. In these or other exceptional circumstances, we will attempt to communicate with students by email.

#### **Course Evaluations:**

Your participation in the evaluation of courses through CourseEvalUM is a responsibility you hold as a student member of our academic community. (www.courseevalum.umd.edu) Your feedback is confidential and important to the improvement of teaching and learning at the University as well as to the tenure and promotion process. CourseEvalUM will be open for you to complete your evaluations for spring semester courses between Tuesday, April 27 and Wednesday, May 12. Please go directly to the website (www.courseevalum.umd.edu) to complete your evaluations starting April 27. By completing all of your evaluations each semester, you will have the privilege of accessing online, at Testudo, the evaluation reports for the thousands of courses for which 70% or more students submitted their evaluations.

Final Exam:

Date & Time To Be Announced

# Physics 171 Course Schedule Spring 2010 — Professor Abazajian

	<u>Date</u>	HW due	Lecture topic(s)	Reading assignment
Mon Tue	25-Jan 26-Jan		Course intro; Measurement and units Mechanics Survey	1-1 to 1-5
Thu	28-Jan		Vectors and coordinate systems	1-6, 1-7
Fri	29-Jan		Motion in one dimension, acceleration	2-1, 2-2, 2-3, 2-4
Mon	1-Feb		Motion in two and three dimensions	3-1, 3-2
Tue	2-Feb	HW 1	Circular motion	3-1, 3-2
Thu	4-Feb	I IVV I	Peer Instruction; Newton's 1st & 2nd laws	4-1, 4-2, 4-3
Fri	5-Feb		Forces	4-1, 4-2, 4-3 4-4, 4-5
ГП	3-Feb		Forces	4-4, 4-3
Mon	8-Feb		Force Problems	4-6
Tue	9-Feb	HW 2	Newton's 3rd law	4-7, 4-8
Thu	11-Feb		Force Problems; Peer Instruction	
Fri	12-Feb		Friction and drag	5-1, 5-2
Mon	15-Feb		Solving problems with curved paths	5-3
Tue	16-Feb	HW 3	Time-varying forces, Center of Mass	5-4, 5-5
Thu	18-Feb		Review	,
Fri	19-Feb		Exam 1	
Mon	22-Feb		Peer Instruction; Energy and work	6-1, 6-2
Tue	23-Feb	HW 4	Dot products, work, and power	6-3, 6-4
Thu	25-Feb		Potential energy; Conservation of energy	7-1
Fri	26-Feb		Peer Instruction; Conservation of energy	7-2, 7-3
Mon	1-Mar		Quantization of energy; Many Bodies	7-1, 8-1, 8-2
Tue	2-Mar	HW 5	Solving problems with collisions	8-3
Thu	4-Mar		Reference frames	8-4
Fri	5-Mar		Peer Instruction; Relativity	R-1 to R-4
Mon	8-Mar		Relativity of Simultaneity tutorial	R-5
Tue	9-Mar		Relativistic momentum, energy, and particles	R-6
Thu	11-Mar	HW 6	Peer Instruction; Review	11-0
Fri	12-Mar	1100	Exam 2	
	12 11101			
	Spring B	reak: Marc	ch 15-19	
Mon	22-Mar		Rotational kinematics	9-1, 9-2
Tue	23-Mar		Moment of inertia	9-3, 9-4
Thu	25-Mar		Solving problems with torque and rotation	9-5
Fri	26-Mar		Peer Instruction; Torque	9-6
			,	
Mon	29-Mar		The vector nature of rotation	10-1
Tue	30-Mar	HW 7	Angular momentum and torque	10-2
Thu	1-Apr		Gyroscopes & Angular Momentum	10-2

Fri	2-Apr		Gyroscopes & Angular Momentum	10-3
Mon Tue Thu Fri	5-Apr 6-Apr 8-Apr 9-Apr	HW 8	Peer Instruction; Conservation of L Static equilibrium Elasticity Peer Instruction; Problem-solving workshop	10-4 12-1 to 12-4 12-7
Mon Tue Thu Fri	12-Apr 13-Apr 15-Apr 16-Apr	HW 9	Kepler's Laws and Orbital Mechanics Gravitational force and potential energy Review Exam 3	11-1, 11-2 11-2, 11-3
Mon Tue Thu Fri	19-Apr 20-Apr 22-Apr 23-Apr	HW 10	Peer Instruction; Gravitational fields and tides Exam 3 solutions Density and pressure in fluids Buoyancy	11-4 13-1, 13-2 13-3
Mon Tue Thu Fri	26-Apr 27-Apr 29-Apr 30-Apr	HW 11	Fluids in motion Peer Instruction; Simple Harmonic Motion Pendulums Damped, driven oscillations	13-4 14-1, 14-2 14-3 14-4
Mon Tue Thu Fri	3-May 4-May 6-May 7-May	HW 12	Peer Instruction; Temperature Thermometers and refrigerators The ideal gas law The kinetic theory of gases	17-1 17-2 17-3 17-4
Mon Tue	10-May 11-May		Review – first half of the course Review – rest of the course	

Final exam <u>TBA</u>
