

## **Notes on how to study:**

- Give a chapter a cursory read before lecture
- Print out lecture notes ahead of class ( if available). Take notes on slides/back-side.

## **Notes on how to do homework:**

- Read some section(s) and take notes from book
- Work those homework problems pertaining to section(s) *away from computer!*
- Login to computer terminal and check answers
- Spend a moment reflecting on the concepts the homework problem examined
- Reiterate through out week and finish homework on time

*Quizzes and Exams will presume know how to work **all** problems.*

*If you don't do the homework, you will be killed by exams and quizzes*

## **Notes on how to study for quizzes:**

- Review homework and compare with posted solutions
- Review your book notes + lecture notes
  - Write up your 3x5 card
  - Minimize memorization in many cases by remembering principle(s) + derivation

## **Notes on how to study for exams:**

- Review book notes + Lecture notes + the homework problems you have written
