

A soccer player first kicks a soccer ball and then a bowling ball using the same kick.

Which ball will leave his foot going faster?

1. The soccer ball because it's lighter.
2. The bowling ball because it's heavier.
3. Both the same since he used the same kick.
4. The soccer ball, but for some other reason.
5. The bowling ball, but for some other reason.
6. Both the same, but for some other reason.
